2016 year -
24 residents

Industrial Park M-7

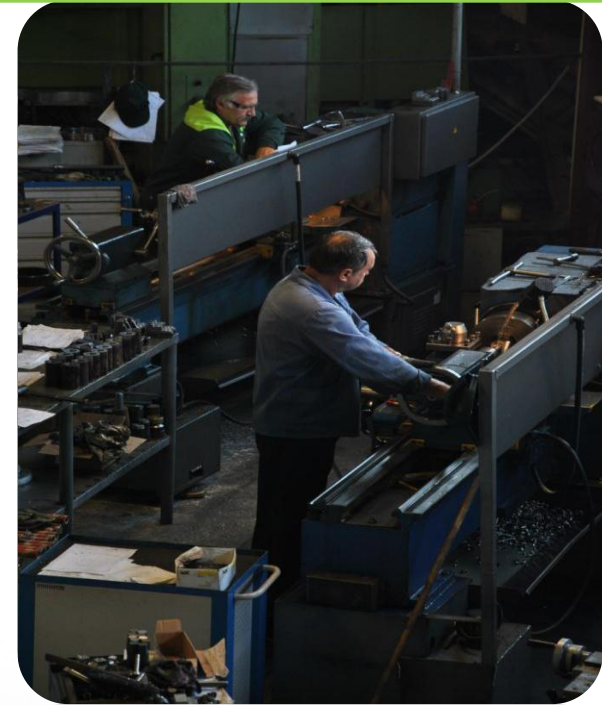

Increasing levels of social employment

2012 – 150 jobs
2013 – 283 jobs
2014 – 306 jobs
2015 – 380 jobs

**When launching the
projected capacity -
3 500 jobs**

Resident Ltd “Volzhanin”

“Volzhanin” Factory is one of Russian leaders in production of welding machines (SSPT type) for butt-welding of polyethylene pipes (diameter from 40 to 1600 mm). The equipment of “Volzhanin” is certified according to GOST and characterized by its unique reliability, mobility and universality, well construction and best prices. The Factory’s own construction bureau gives opportunity to develop any decisions from the very beginning to a finished product.

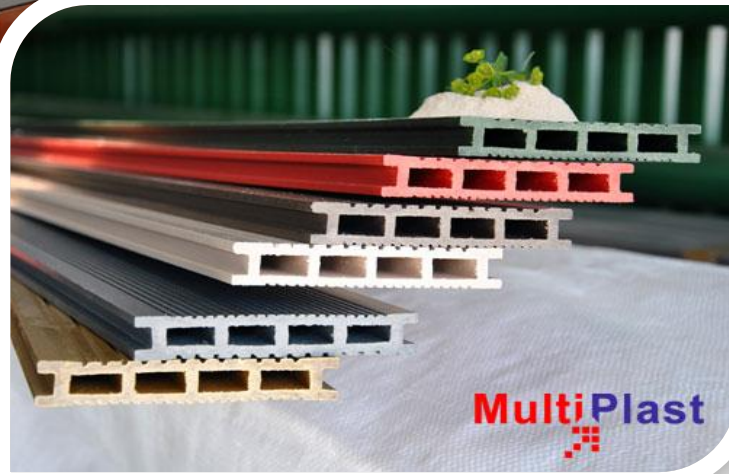

Among the main achievements of “Volzhanin” in 2012:

- Extra building for production
- Laser cutting machine

Resident Ltd “MultiPlast”

“MultiPlast” company is a high technological company, which is one of Russian Market’s leaders in production of decking from wood and plastic composites products.

MultiDeck wood and plastic composites products are produced by equipment of Italian Company ICMA San Giorgio, which started recycling plastic in 1965 and released its first double-screw extruder.

Decking board – is a modern building material, used as flooring for terraces, verandas, piers, and berths, decks and gazebos.

Among the best achievements in 2012 is purchase of extra production line for manufacturing of new decking type.
